LIGHT TOWERS BRING NATURAL LIGHT IN

Located in play area and
central education lobby

INSIDE McDONALD PLAYLAND

Used for pre-school, parties
and open to community

LIGHT TOWER IN PAY AREA

CASE STUDY

Existing church needed to expand and add education space. Master plan and site development was created and drawn by Bon Builders. Project fit the site and budget and is well used on a daily basis.

PROJECT SPECIFICATIONS

- 10,800 total square feet
- Education and “play” area
- Total site master plan for this and additional phases
- Planned expansion on triangular site
- Complete project – 10 months

UNIQUE CHALLENGES

Previous designer-builder positioned the church in a challenging position on land for addition. Bon Builders design team created a way to expand the building and create additional expansion phases in master plan. This was accomplished by creating education space around central gathering areas with light towers providing natural illumination.

CLIENT SATISFACTION

"Our new building is both attractive and functional. Bon Builders did an excellent job of master planning...our new education wing draws the children of the community in to use our play area...a real draw."

*Duane Anders, Senior Pastor
Stillwater Church*
