## WORSHIP

## CASE STUDY

### BETHESDA TEMPLE

3701 SALEM AVE, DAYTON, OHIO

Youth facility for a growing Dayton congregation. Full court gym, coffee shop/juice bar, offices, education space and game room mezzanine highlight this facility.

### PROJECT SPECIFICATIONS

- 13,345 total square feet
- Combination of exterior building materials
- Tight building lot made placement critical for maximum parking
- Complete project – 8 months

### CURVED COFFEE SHOP/JUICE BAR

Front entrance is highlighted by brick accent

### MODEL W/O ROOF

This model helped the congregation visualize what their new youth facility would look like

### MODEL WITH SITE LAYOUT

### UNIQUE CHALLENGES

Placement on this site was critical for future ministry opportunities. Master Planning included senior housing, so space was critical. Curved wall and roofline added quite a bit of curb appeal facing Salem Ave.

### CLIENT SATISFACTION

"We are thrilled with our youth facility...it's a statement to our community...the design and build process worked well...the people of Bon were great to work with."
